GitHub.

Experiences

CODSOFT(internship): Currently undertaking an internship at Codsoft, gaining hands-on experience in software development and honing skills in areas such as coding, problem-solving, and project management.

SHADOWFOX(internship): Engaged in an enriching internship experience at Shadowfox, actively contributing to software development projects and refining skills in coding, testing, and software engineering methodologies.

PROJECTS

Spotify Clone: Developed a Spotify-inspired music streaming application utilizing HTML, CSS, and JavaScript, showcasing proficiency in front-end web development, demonstrating hands-on experience in full-stack development.

Landing page: Crafted a visually captivating and fully responsive landing page utilizing HTML and CSS, showcasing expertise in front-end web development. Employed modern design principles and media queries to ensure seamless display across various devices, emphasizing a commitment to user accessibility and engagement.

webApp: Designed a dynamic and visually appealing app interface using HTML and CSS, demonstrating creativity and proficiency in front-end web design. Incorporated intuitive layout structures and interactive elements to enhance user engagement and usability, showcasing a keen eye for user experience optimization.
